MotiveWave Software Releases Version 6.0 Beta of their Trading Platform

MotiveWave Software has released its Version 6.0 Beta, which adds many new features including Cloud Workspaces, major DOM features, Custom Watchlists, P/L Calculator, and Continuous Contracts.

Kelowna, BC – **May 28, 2019** – MotiveWave Software, a Kelowna-based developer of easy-to-use high-performance charting and trading software, has been busy this year adding many new features to its already full-featured charting and trading platform. MotiveWave now includes Cloud Workspaces, very advanced DOM functionality and enhancements, Custom Watchlists, a Profit Loss Calculator, Continuous Contracts, and many other new features and enhancements.

Here are just a few highlights of the latest features and enhancements to be added into MotiveWave for Version 6:

Version 6.0 Beta 2:

- Market By Order -- Displays individual order sizes in the Bid/Ask Columns.
- Big Trades Study -- Ability to filter out smaller sizes and just see the large orders/Big Players.
- More Depth Levels in DOM (Depth of Market) beyond the standard 10 -- Users can see the full order book.
- DOM Position in Queue -- User can see where their order is in the queue.
- Additional enhancements to the TPO Study and Volume Imprint Study.
- OHLC (Open High Low Close) Study
- Custom Elliott Wave Ratios -- Users can now edit existing, or create their own custom ratios and custom format.

Version 6.0 Beta 1:

- Cloud Workspaces -- Workspaces can now be saved to the Cloud. Cloud workspaces are hosted on MotiveWave's server and can be accessed from any computer using the same license key.
- DOM (Depth of Market) will now re-center automatically based on a user defined amount of ticks that it's trading away from the center point.
- Many Additional columns within the DOM including Notes, Delta Volume, Bid and Ask Volume.
- Support for Futures Continuous Contracts.
- Custom columns in Watch lists and Quote sheets.
- Watch List Flags and Filtering -- A flag can be displayed in a Watch List (or Quote Sheet) to highlight important or notable instruments, and the symbol list can be filtered based on those flags.
- Gauges -- Used to visually display statistics or study values in a panel in the Console or Desktops.
- New Support and Resistance Zone components.
- Profit/Loss Calculator
- Auto Backup

"MotiveWave Version 6.0 is proving to be one of our biggest major releases yet and it is an exciting step forward in the evolution of our software", said Tony Lindsay, Founder of MotiveWave Software, "With

Version 6.0, we've made some necessary and huge improvements to our DOM, as well as packing in a large number of other enhancements. We now believe we are the best trading software that you've never heard of, and we plan on changing that soon too. We've shown that we continually keep improving the product based on what's best for the user experience and what's best for the software itself. We still have no intention of slowing down."

MotiveWave Version 6.0 will be officially released later this year. See all of the highlights for the MotiveWave Version 6.0 Beta in the What's New in Version 6.0 Beta Guides found on the MotiveWave Download Page or watch the highlight videos below:
